SUMMARY

Frontend Developer skilled in HTML, CSS, JavaScript, and React, with hands-on experience using Firebase and Appwrite for backend integration. Build responsive, interactive user interfaces with clean design practices and smooth animations using Framer Motion. Combines development skills with UI/UX design experience in Figma to deliver polished, user-focused products. Quick learner, eager to apply strong fundamentals to real-world applications and grow within a professional engineering team.

SKILLS

Frontend: HTML, CSS, JavaScript, React

Libraries & Tools: Framer Motion, Firebase, Appwrite

Design Tools: Figma (UI/UX design, prototyping, wireframing)

Concepts: Responsive Design, API Integration, UI/UX Fundamentals

Version Control: Git, GitHub

PROJECTS

Portfolio Website | [Live Site](#) | [Source Code](#)

- Built a fully responsive personal portfolio using React and Tailwind CSS to showcase projects and skills
- Implemented smooth, engaging animations with Framer Motion to enhance user experience
- Designed a clean, user-friendly interface with consistent responsive layout across devices
- Deployed and maintained the live application on Netlify

SkillScan-AI Resume Analyzer | [Live Site](#) | [Source Code](#)

- Developed a React-based application that analyzes resumes using AI and provides actionable feedback
- Integrated the Groq API to deliver real-time, AI-generated resume feedback
- Built logic to extract and process text content from uploaded PDF resumes
- Designed a responsive, interactive UI and deployed the application on Vercel

EDUCATION

Bachelor of Computer Applications (BCA)

Teerthanker Mahaveer University | 2024 – 2027

Class XII

Bihar School Examination Board (BSEB) | 2024

STRENGTHS

- Quick learner with strong adaptability to new tools and technologies
- Detail-oriented, with a strong focus on improving UI/UX and overall user experience
- Proactive about learning industry best practices and applying them to real-world projects
